<p>Reagents and kits comprised of reagents for scientific or medical research use; diagnostic reagents and kits comprised of diagnostic reagents for scientific or medical research use. Cellular pathway exploration tools, and assays such as ion channel assays, nuclear receptor assays, enzyme-linked immunosorbent assay (ELISA), kinase activity assays, and protein arrays. Reagents including labeled or unlabeled and/or recombinant proteins and antibodies for analysis and/or detection of one or more proteins and/or pathways. Dye conjugates of markers (including key human, mouse and/or rat markers) and antibodies to other proteins including cytokines and chemokines for use in flow cytometry. Media for cell/tissue cultures, cell/tissue culture growth supplements, reagents and buffers for use in cell/tissue cultures, transfection reagents, cryopreservation reagents, cell matrices, flow cytometry and flow cytometry reagents, antibiotics and cells including primary cells, stem cells and cell lines; all for use in scientific, laboratory, and medical research. In vitro ADME cell products, including fresh and cryopreserved hepatocytes and liver subcellular fractions, and transporters derived from a variety of species, including human, non-human primate, dog, rat and</p>					

mouse. Beads and microspheres including magnetic particle-based biomedical separation systems comprising magnetizable polymer beads, the attached antibody and the magnetic particle concentrator for separating a specific selected cell population from a larger, more complex cell population. Biological, chemical and/or biochemical preparations, namely, reagents and kits consisting of one or more of the following (including various combination thereof)-proteins, antibodies, nucleic acid arrays, protein arrays, nucleic acid molecules, protein ladders, nucleic acid ladders, peptides, kinases, growth factors, PCR fragments, cDNA libraries, vectors, enzymes, DNA polymerases, reverse transcriptases, molecules, clones, genes, cell, recombination proteins and sites, restriction enzymes, primers, nucleotides, plasmids, and reagents all for scientific medical research, or research use. Microbiological culture media, animal blood sera, mammalian and insect cells, mammalian and insect cell culture media and cell culture reagents, all for scientific or medical research use. Full line of kits and reagents consisting of one or more of the following - chemicals, antibodies, proteins, nucleic acids, hormones, purification supports, resins, cells, gels, probes, buffers, stains and associated reagents and devices for the expression, amplification, purification and analysis of biological samples. Fluorescent chemicals and dyes for use in scientific research or medical research. Electrophoresis gel and chromatography chemicals, buffers, and solutions for scientific research or medical research. Research and diagnostic biochemical, chemical and biological reagents and kits for agricultural, ecological, DNA typing, food processing, forensic testing, environmental testing and research laboratories. Reagents and assays used for detection and quantitation of DNA, RNA, protein or other analytes in solution, sold individually or in kits for research use or medical use. Chemical reagents for the detection of pathogens and/or toxins in environmental samples. Synthetic DNA; synthetic DNA and molecules used as DNA molecular weight standards; nucleotides; biochemical reagents; buffers; all for scientific and medical research use. Chemicals used for medical purposes, namely, reagents containing ligands, effector molecules and antibodies for scientific or medical research use; antibody-conjugated micro-beads and antibody-conjugated microspheres all for scientific and medical research use and for activation of immune system cells.
